Proporciona una presión profunda y relajante. La tensión y la presión se pueden ajustar a las necesidades de cada usuario fomentando la Integración Sensorial

Bipedestador supino

Se fabrica a la medida del usuario

Permite posicionar a una persona hasta la postura vertical, con el objetivo de prevenir complicaciones musculoesqueléticas, cardiovasculares, respiratorias, entre otras.

Estabilizador de sedestación

Se fabrica a la medida del usuario

Mejora el control del troco y el equilibrio dinámico en sedestación. La estabilidad del troco es importante para evitar deformidades en la columna vertebral, normaliza el tono muscular, facilita la respiración y permite que participe en actividades lúdicas.
